SPECIAL PRESENTATIONS

Jason Smith, Hanover Engineering, presented the Emmaus Borough proposed Pollutant Reduction Plan (PRP) required for the 2019-2024 NPDES Municipal Separate Storm Sewer Systems (MS4) Permit. He stated that the plan is to reduce 10% of the sediments from stormwater in the Borough. He also stated that the plan is a draft and will have changes made to it. Mr. Smith stated that the Borough has received public comments on the plan. Mr. Smith reviewed the plan and stated that the approximate total construction cost over a time period of five years for seven basin retrofits, planting 50 trees within the target area and 15 filter bags is \$702,000. He stated that this does not include street sweeping costs. Mr. Smith stated that other municipalities have instituted a stormwater fee to help fund the project. He entertained questions about the proposed Pollutant Reduction Plan. Mr. Pepe stated that he received an email earlier in the day with a public comment. Mr. Pepe thanked Mr. Smith for his hard work on the proposed Plan and stated that the Borough has a lot of hard work in the future. Mr. Smith stated that once the Best Management practices are implemented over the 5-year term there will be expectations to monitor them. Mr. Anders asked how much sediment bags cost and how long they last. Mr. Smith responded that the cost is approximately \$500.00 a bag and the bags are semi-permanent, but with engineering and design, expect the cost to be \$1,000.
